Adjustable French Casement Strikers

Reason: We have developed new bespoke French Casement Strikers to compliment our existing range of French Casement Extensions. The new strikers will replace the current shootbolt strikers without legs and have been improved by the fact that they are non handed meaning reduced stock holding. They have been designed with 3 screw fixing holes giving greater stability, are profile specific and they are fully adjustable for compression.

An up to date list of part numbers is enclosed.

Specification: French Casement Windows

Availability: Yellow and Silver

Packaging: 100 pieces per box
