

# Q Plus High Flow Brick - Plastic

## For use with Titon's HRV Q Plus and CME Q Plus Ranges

The Q Plus High Flow Brick is a unique design, as the exceptional airflow performance of a single unit makes it ideal for use in ducted domestic ventilation systems, replacing conventional and unsightly airbricks at least twice the size.

A cost effective alternative recommended for use with Titon Q Plus Best Practice MVHR and CME products, the Q Plus High Flow Air Brick is designed to be built into the brickwork during construction. It can be supplied with the appropriate ducting components to bridge the cavity, making it easy to connect to the ventilation system once installed.

## Features & Benefits

- Unique high flow design equivalent to many brick sized grilles
- Cost effective; lower cost than double brick grille and adaptor
- Recommended for use with EST Best Practice systems (Titon Q Plus)
- Saves time and complication of creating double brick size aperture
- Designed to be an integral part of external walls
- Q Plus High Flow Brick AAO = 8670mm<sup>2</sup>
- Q Plus High Flow Brick EA = 10602mm<sup>2</sup>
- Can be supplied with short duct length for build in during construction, creating an unobstructed air path
